Hi Dick,

The updated calculations are attached. We should be able to submit modeling files later next week. If that time frame changes, I will let you know. In the meantime, I will work on addressing your other questions and comments.

Thanks,

Subject: Initial Comments on Supplemental Information

Katie –

I received the updated information from you in an email dated September 14, 2013. I have the following initial comments and questions.

- Please provide an updated, unlocked calculation spreadsheet.
- Please provide a summary of what portions of the initial application should be retained and what should be ignored. This should include answers to the following questions:
  - Do the stack parameters, etc., for Boiler #1 now differ from what was presented in the original application?
  - Does the NSPS for Boiler #3 remain the same as was presented in the original application?
- Please confirm that Boiler #3 will not be used to generate electricity.
- Portions of 40 CFR 63.11214(b) are highlighted, indicating that the regulation applies to an existing boiler. Does this apply to Boiler #3 or to Boiler #1?
- 40 CFR 63.11214(d) is highlighted. This appears to conflict with 40 CFR 63.11210(e), which is also highlighted. Please clarify.
- 40 CFR 63.11222(a) is highlighted. This appears to conflict with 40 CFR 63.11210(e), which is also highlighted. Please clarify.
- When should the MPCA expect to receive additional modeling information?

I will continue to review the supplemental information.
