Dear Troy,

Sorry to have interrupted your vacation.

I spoke with Tim and he would like to continue to pursue a permit amendment for the temporary boiler. We are drafting a waiver request letter for him to submit. I understand that he was on vacation last week and you are this week, which delayed the submission of a formal, signed, waiver request to the MPCA.

Thanks, Todd

I am unsure of the status of the boiler project. My last conversation with Donn Johnson was that we were going to discontinue. Speak with Tim Kedrowski he may have more insight. I am back in the office next Tuesday.

Troy,

I left a phone message for you yesterday. I have not yet heard whether Sanimax intends move forward with the

temporary boiler or if the project will change to include a permanent boiler. We need to keep making progress on our permitting workload and make best use of our resources, so we'll be returning the Sanimax application as incomplete due to the lack of modeling results among other things. Dick Cordes will be assigned to work on another project for now. If and when the application is resubmitted, I will assign a permit engineer as soon as possible.

Regards,
Steve
