Subject: Sanimax Air Permit Application
Date: Thursday, May 30, 2013 10:35:13 AM

Troy,

I left a phone message for you yesterday. I have not yet heard whether Sanimax intends move forward with the temporary boiler or if the project will change to include a permanent boiler. We need to keep making progress on our permitting workload and make best use of our resources, so we'll be returning the Sanimax application as incomplete due to the lack of modeling results among other things. Dick Cordes will be assigned to work on another project for now. If and when the application is resubmitted, I will assign a permit engineer as soon as possible.

Regards,
Steve
