Jennifer or Rachel –

I am working on a major modification to a Part 70 permit for Sanimax USA Incorporated at 505 Hardman Ave South in South Saint Paul (Dakota County). I am wondering if this is an area where environmental justice might be an issue to consider.

If I do not hear from you by August 14, 2013, I will assume this facility is not of interest and move forward with the permit. If you would like more time to assess potential environmental justice issues, please notify me.

Please let me know if you need any additional information. Thank you.
