Subject: Return of application for air quality permit amendment
Date: Thursday, November 13, 2014 10:56:00 AM

Dear Mr. Bech –

The MPCA is planning to return the application for a major permit amendment that Sanimax submitted to the MPCA on May 7, 2013.

This permit application was assigned to me. My work on the permit application progressed until September 14, 2013, when I requested from your consultant information needed to process the major permit amendment. On November 1, 2013, I told you that we had not received the requested information and that failure to submit the information by November 8, 2013 would result in a loss in priority of the major permit amendment. Since I did not receive the requested information by then, I was assigned to another project.

Since more than a year has passed since I made the information request, it appears that you do not plan to move forward with the project. If that is true, we will close out the permit action. Please submit the requested information by 4:30 PM on December 1, 2014 or we will return the permit application to you. The MPCA will retain any fees submitted for that permit action.

Call me if you have any questions.

Richard Cordes, P.E.
