SUMMARY OF FINDINGS

Hydrophytic Vegetation Present? Yes
Wetland Hydrology Present? Yes
Hydric Soils Present? Yes
Is This Sampling Point Within A Wetland? **Yes**

Remarks: A seasonally-flooded basin in a cultivated field planted to soybeans. The vegetation is disturbed from tillage and herbicide use. The soils are disturbed from tillage. The sample point is near a drainageway that cuts through a shelterbelt into the field to the east where the wetland fades out; there is no developed drainage channel. All parameters of wetland conditions are met.
