SUMMARY OF FINDINGS

Hydrophytic Vegetation Present?	No	Hydic Soils Present? Yes	
Wetland Hydrology Present?	No	Is This Sampling Point Within A Wetland?	No

Remarks: The upland sample point is located in a fallow field near an existing petroleum pipeline. The vegetation is dominated by smooth brome. Relict hydric soils are present; however, no other wetland indicators are present.

Remarks: Relict hydric soils were observed; however, the area has been ditched and drained to the extent that the site no longer supports hydrophytic vegetation.
