## WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

| Project/Site: L3R   | _ City/County: _ Clearwater Sa                | ampling Date: 10/13/2014                            |
|---|---|---|
| Applicant/Owner: Enbridge   | State: MN                                     | Sampling Point: u-149n38w16-h1                      |
| Investigator(s): MRK/OTG  |   | nship, Range:                                       |
| Landform (hillslope, terrace, etc.): Talf                                       |   | ave, convex, none LL                                |
| Slope (%): 0 - 2% Lat.: 47.72387383   | Long.: <u>-95.51723533</u> Datum:             | WI Classification:                                  |
| Soil Map Unit Name: 582  Are climatic/hydrologic conditions of the site typical |   | f no, explain in remarks)                           |
| Are vegetation , soil , or hydrol   |   | Are "normal   |
| Are vegetation , soil , or hydrol   |   | circumstances" present?                             |
| (If needed, explain any answers in remarks)                                     | <u> </u>                                      | _   |
| ,   |   |   |
| SUMMARY OF FINDINGS   |   |   |
|   |   |   |
| Hydrophytic vegetation present?  N  | _ Is the sampled area within a                | wetland? N  |
| Hydric soil present?  Indicators of wetland hydrology present?  N               | - If you entional watland site IF             | ۸.  |
| Indicators of wetland hydrology present?  N                                     | _ If yes, optional wetland site ID            | ·   |
| Remarks: (Explain alternative procedures here or in                             | a separate report.)                           |   |
| Upland sample point is located in a recently cultivated soybean field.          |   |   |
