SUMMARY OF FINDINGS	1	
Hydrophytic vegetation present? Y	Is the sampled area with	in a wetland?

ndicators of wetland hydrology present? Y If yes, optional wetland site ID:		
Demortor / Evaloir alternative procedures here as in a concrete report		
Remarks: (Explain alternative procedures here or in a separate report.)		
The wetland is a wet meadow dominated by reed canarygrass in a slight depression in an existing pipeline		
corridor. There is a very gradual transition between the wetland and the upland. The wetland does not extend
