Mr. Curt Bjertness
Wolverton Farmers Elevator
Box 69
Wolverton, Minnesota 56594

Dear Mr. Bjertness:

RE: Petroleum Contaminated Soil Land Application Site Monitoring
Site: Wolverton Farmers Elevator, Wolverton
Site ID#: LEAK00003517

On June 27, 1991, the Minnesota Pollution Control Agency (MPCA) staff issued a letter of approval for land application of petroleum contaminated soil from the site referenced above. The approval letter specified that additional follow-up soil analysis as outlined in part III.C of the MPCA document "Land Application of Petroleum Contaminated Soil: Single Application Sites" (May 1991) is required at the land application site.

MPCA records indicate that no monitoring results for the land application site have been received. Please submit monitoring results for any soil samples collected at the land application site to date. If no soil monitoring has been done, please submit a written explanation why the required work has not been done and indicate your intentions for further soil monitoring at the land application site. You are reminded that failure to fulfill MPCA monitoring requirements may result in reduction reimbursement from the Petro Board.

If you would like a copy of the MPCA form entitled "Soil Monitoring Results for Land-Applied Petroleum Contaminated Soil" or have any questions, please contact me at 612/297-8576. Thank you.

Sincerely,

David Holst
