RE: Air Emission Permit No: 03700070-006
Quarterly Fuel Certification: October – December 2015

Distillate Oil:

From October – December 2015, we burned 0 gallons of distillate fuel oil.

NOTE: Minnesota Statute 1990, Section 41A.09, Subdivision 2. “Any high sulfur diesel fuel or heating oil sold in Minnesota can be no more than 1.5% sulfur.” All fuel burned by Sanimax USA Inc. meets this requirement. See previously submitted letter from our supplier.

Residual Oil

From October – December 2015 we purchased 0 gallons of Residual Fuel Oil. In the past we have submitted fuel oil (#6) delivery tickets from Marathon Ashland Petroleum LLC and our secondary supplier, TexPar Energy. If you would like additional documentation, please let me know.

This report represents all distillate and residual fuel combusted at this location during this period.

I believe the above information satisfies the requirements of our permit to provide fuel oil certification as described in Table A, page A-15 and also in the Operators Summary under Reporting. If you find this information to be incorrect, or you feel you need additional information, please feel free to contact me @ (651) 451-6858 extension 1510.

Sincerely,

Michael Moyer
General Manager
