Subject: Petrofund Reduction for L-3534, Junction Food-N-Fuel, Curtis Oil

Mark:

I met with the consultant for this site today. They are moving ahead with the approved corrective actions. Because the corrective actions for this site has been (they replaced a drinking water well) and will yet be (injection of ORC) rather expensive, the consultant again begged that the existing 25% cooperation reduction be removed. I again explained that we prefer that the Petro Board make that decision. When he countered that my opinion can make a big difference, I did agreed that the RP is indeed now cooperative and I personally had no problem with this reduction going away. They expect that this site will be on the agenda at the August board meeting. Since I will be on vacation during that meeting, I said that I would pass along my thoughts to you. (Those were it.)

Let me know if you have any questions.

Steve
