RE: Request For Additional Work
Site: Junction Food-n-Fuel
Site ID#: LEAK00003534

Dear Mr. Curtis:

The Minnesota Pollution Control Agency (MPCA) staff has reviewed the "Annual Monitoring Report", dated February 25, 2008, submitted by Twin Ports Testing (TPT), your environmental consultant for this site. Based on the information provided in the report, it has been determined that additional work is required at the site. Please complete the following activities:

- 1) Sampling of the monitoring wells associated with this site can be discontinued.
- 2) Collect groundwater samples from the following water supply wells. The samples collected must be analyzed for volatile organic compounds (VOCs), and gasoline range organics (GRO).
 - a. Quarterly: PW-4621 and PW-5497.
 - b. Annually: PW-2, PW-5492, and PW-5506A.
- 3) Collect semi-annual air samples from the following locations. The samples collected must be analyzed for VOCs using EPA Test Method TO-15.
 - a. The previously used indoor air sampling location for Casa Latte.
 - b. The sub-slab soil vapor monitoring point installed at Casa Latte.

In order to minimize cross-contamination, the indoor air samples should be collected before the sub-slab vapor samples. The indoor air samples and the soil vapor samples should be collected no more than two days apart.

- 4) After completing the work listed above, complete and submit MPCA Guidance Document 4-08 *Annual Monitoring Report* detailing the results. This report is due by May 31, 2009.

Mr. Jack Curtis

Failure to meet deadlines listed in this letter in a timely manner may result in reductions in Petrofund reimbursement or lead to MPCA enforcement actions.

If you have any questions regarding this letter, please contact Sarah Larsen at 651-296-7824 or Kevin Mustonen, staff hydrogeologist, at 218-529-6274. If you are calling long distance, you may reach the MPCA by calling 1-800-657-3864.

Sincerely,

Sarah Larsen
