Subject: workplan request for Alex Exhaust, Leak 15656

Here's the work we'd like you to do at Alex Exhaust prior to June of 2008:

1. Provide a copy of the Excavation Report completed for MNDOT relating to the excavation completed in 3rd Ave just south of this site.
2. Install at least 3 more borings/temp MWs in the following locations:
 - o approximately 100' east of B3
 - o S to SSE of B3, just S of 3rd Ave,
 - o S of B1, just S of 3rd Ave, and
 - o more borings as necessary to delineate the contamination. For the workplan figure a 4th boring. If more are needed beyond that, contact me and prepare a change order.
3. Provide an analysis of grain size, and
4. For receptor survey, personal contact must be attempted. Document your attempt.

Please submit a workplan with your cost estimate.

Thanks,
Arlene
