Fund Financed Site Evaluation Form

Once completed please submit the form to the Remediation Contract Coordinator (Jayne Stillwell-Lamb)

Before a LUST site can become a fund financed site and state money can be spent, one of the
following conditions needs to be met (check which one applies). Refer to 115C.03, subd.2 for
statutory requirements.
1. A Commissioner's Order has been issued and the RP is financially unable to proceed
2. A Commissioner's Order has been issued and the RP is unwilling to do the work
3. The RP is deceased and no other viable RPs exist
4. The MPCA cannot locate the RP and no other viable RPs exist \(\subseteq \)
5. The MPCA cannot determine the source of the petroleum tank release
6. Other:
Date: _3/15/06
Leak Number: <u>Leak00015656</u>
Project Manager: LMK Hydrogeologist: NA Site Name: Alex Exhaust
Site Address:905 Third Avenue East, Alexandria, MN 56308
Site Phone Number: 320/763-5574
RP Information
RP Name: NA
RP Address:
RP Phone:
Current Property Owner Name: Ben Zacher
Current Property Owner Address: 901 Highway 29 North, Alexandria 56308
Current Property Owner Phone: 320/760-1712
Tank Information
Tank Information
Have all tanks been removed? Unknown. Release appears to be associated with former
Cenex station which operated up until the early 1960s. If yes, please list date(s) of
removal:
If the tanks are still in place, please provide information below on the number, type and location
of tanks:
Environmental Impact
Check appropriate boxes and provide brief explanation
High Priority/ER initially involved:
Impacted Water Supply Well
> 10 % LEL in utilities or structures
Vapor intrusion into living spaces
Other:
High Priority
1" or greater free product
Water supply wells within 500 feet of impacted aquifer
Contamination entering surface waters

☐ Surface Runoff
Impacted aquifer in hydrogeologically sensitive area (karst, sole source, etc)
Other:
Medium Priority
Less than 1" free product
Impacted aquifer with water supply wells > 500 feet from plume
Unknown, but potential risk to surface water
Unknown, but potential risk to vapor receptors
Unknown, but potential risk to drinking water wells
Unknown risk, unknown conditions
Other:
Low Priority
Impacted aquifer with no water receptors at risk
Low potential risk for surface water contamination
Low potential risk to vapor receptors
Soil only or non-aquifer impact
Other:
Briefly describe all site work completed to date: Release reported 2/25/04 as result of
Phase II ESA (report copy not provided). Highest PID reported as 870 ppm with stained
soil and petro odors. Site needs LSI.

- Provide information to confirm that there are no other viable RPs (briefly describe site ownership history, etc.): According to current property owner, Ben Zacher whom runs an exhaust business on the site, there are no tanks on the property. Ben purchased from Jim Norton about 5 years ago. At the time Jim Norton purchased the site it was vacant and Jim fixed it up as an exhaust shop. Cenex operated a station on the site up until the early 1960s after which time the site was vacated.
