Mr. Craig L. Johanesen
Foth and VanDyke
6474 City West Parkway
Eden Prairie, Minnesota 55344

Dear Mr. Johanesen:

RE: Petroleum Release, Waste Management, Inc., Savage, LEAK00000990

The Minnesota Pollution Control Agency (MPCA) staff has completed its review of the February 27, 1989, report entitled: "Petroleum Release Corrective Action Report, Waste Management, Inc., Savage, Minnesota" as submitted by Foth and VanDyke on behalf of Waste Management, Inc.

The MPCA staff in general concur with the proposed work as set forth on page 15 of the report. However, we do have a few comments to provide as follows:

- All ground water monitor wells installed must be of low carbon black or galvanized steel casing.
- Ground water samples must be analyzed for total hydrocarbons as gasoline and fuel oil.
- Soil borings or test pits are needed along the north, northeast side of the building to determine the status of the abandoned tank in the building.
- At this time the investigation should concentrate on the contamination in the surficial deposits as planned; however, it is the MPCA staff's opinion, based on the information provided in the report, that bedrock wells will probably be needed later on.

Should you or your client have any questions or comments about this letter, please call Mr. Dave Koubsky at 612/296-7284 or myself at 612/296-7974.

Sincerely,

John R. Moeger
Project Leader
Tanks and Spills Section
Hazardous Waste Division
