Location: Hallock High School, Hallock
 (City, Village, Township, Section, Range, County, etc.)

Subject: Review of 5/18/90 Excavation Report

By Whom: J. Golden Date: 11-8-90

Investigation _____ Office _____
 Conference Field _____ Hearing _____ Meeting _____ Phone

Items to be Covered: (1) Those present and/or those interviewed
 (2) Situation
 (3) Further action, follow-up, recommendations

1) Craig Diekvoss, MECC, Mpls 612/781-1647

2) I asked Craig about soil sample SW-9, on Figure 4. There was no analytical data for it.

Craig said only H-nu readings were taken.

I also questioned Craig on last P of page 10 of Conclusions and asked Craig why they

did not excavate more soil here, since

the H-nu reading was 10.9 PPM. Craig said

they were at 400 yds and didn't think

they could excavate more w/o special

permission from MPCA. Craig estimated

that about 5 yds remained that could

have been taken out.

3) I requested, that at future sites the consultant

should call in and notify us they've hit the

400 yd maximum cut off and let us make

the call on whether or not they can/should

excavate more.
