RE: Petroleum Tank Release Site File Closure
Site: Granite City Iron Works, 905 35th Avenue NE, Sauk Rapids
Site ID#: LEAK00015798

Dear Mr. Fox:

We are pleased to let you know that the Minnesota Pollution Control Agency (MPCA) Petroleum Remediation Program (PRP) staff has determined that your investigation and/or cleanup has adequately addressed the petroleum tank release at the site listed above. Based on the information provided, the PRP staff has closed the release site file.

Closure of the file means that the PRP staff does not require any additional investigation and/or cleanup work at this time or in the foreseeable future. Please be aware that file closure does not necessarily mean that all petroleum contamination has been removed from this site. However, the PRP staff has concluded that any remaining contamination, if present, does not appear to pose a threat to public health or the environment.

The MPCA reserves the right to reopen this file and to require additional investigation and/or cleanup work if new information or changing regulatory requirements make additional work necessary. If you or other parties discover additional contamination (either petroleum or non-petroleum) that was not previously reported to the MPCA, Minnesota law requires that the MPCA be immediately notified.

You should understand that this letter does not release any party from liability for the petroleum contamination under Minn. Stat. ch. 115C (2002) or any other applicable state or federal law. In addition, this letter does not release any party from liability for non-petroleum contamination, if present, under Minn. Stat. ch. 115B (2002), the Minnesota Superfund Law.

If future development of the site or the surrounding area is planned, it should be assumed that petroleum contamination might be present. Property with petroleum contamination to soil or ground water may cause on-site vapor risks to future occupants. The MPCA can assist you with environmental risk and development plan review. MPCA VPIC staff will review and approve plans for property development. If petroleum contamination is encountered during future development work, the MPCA staff should be notified immediately.

Mr. John Fox

November 5, 2004

For specific information regarding petroleum contamination that may remain at this leak site, please call the Petroleum Remediation File Request Program at 651/297-8499. Thank you for your response to this petroleum tank release and for your cooperation with the MPCA to protect public health and the environment. If you have any questions regarding this letter, please call me at 651/296-7999.

Sincerely,

Mark Koplitz

RE: Completion of Voluntary Response Actions for Petroleum Contamination
Site: Granite City Iron Works, 905 35th Avenue NE, Sauk Rapids
Site ID#: LEAK00015798

Dear Mr. Fox:

The Minnesota Pollution Control Agency (MPCA) Voluntary Petroleum Investigation and Cleanup (VPIC) program staff has reviewed the following documents describing your management of petroleum impacted soils as part of voluntary cleanup work completed at the above-referenced site:

- "DRAP Implementation Report" dated September 24, 2004, prepared by ProSource Technologies, Inc.

Based on the information provided, MPCA VPIC staff has concluded that petroleum contaminated soils were managed as proposed in the development plan approved by MPCA VPIC staff. Thank you for your participation in the VPIC program. If you have any questions regarding this letter, please call me at (651) 296-7999.

Sincerely,

Mark Koplitz

Foley, MN 56329

RE: Approval of Voluntary Response Actions for Petroleum Contamination
Site: Granite City Iron Works, 905 35th Avenue Northeast, Sauk Rapids
Site ID#: LEAK00015798

Dear Mr. Fox:

The Minnesota Pollution Control Agency (MPCA) Voluntary Petroleum Investigation and Cleanup (VPIC) program staff has reviewed the following documents regarding your intent to manage petroleum contaminated soils and/or ground water at the above-referenced site:

- “Phase II Investigation/Development Response Action Plan” dated August 13, 2004 prepared by ProSource Technologies, Inc.

Based on the information provided, the MPCA VPIC staff is approving the above-referenced plan as proposed. A minimum two foot buffer of clean soil is required as part of the response actions. If future activities include residential development a minimum of four feet of clean soils is required in all green space areas.

Approval assumes that an implementation report will be provided to the MPCA summarizing the voluntary cleanup work once completed. If subsequently obtained information indicates that the proposed activities are inappropriate or inadequate, the MPCA may request modifications in the proposed work.

This letter does not apply to other types of contamination if present at the site. Approval of this plan does not suggest that any of the costs incurred will be eligible for reimbursement from the PetroBoard.

Mr. John Fox

RE: Storage Tank Release Investigation and Corrective Action

Site: Granite City Iron Works, 905 35th Avenue NE, Sauk Rapids, 56379, Benton
Site ID#: LEAK00015798

Dear Mr. Fox:

Notice of Release

The Minnesota Pollution Control Agency (MPCA) has been informed that a release has occurred or contamination has been encountered from storage tanks and/or storage tank facilities that you own and/or operate. The MPCA appreciates your timely notification so this site can be handled in an efficient manner.

Legal Obligations

Federal and state laws require that persons legally responsible for storage tank releases notify the MPCA of the release and/or discovery of contamination, investigate and, if necessary, clean up the release(s)/contamination. A person is considered legally responsible for a petroleum tank release if the person owned or operated the tank either during or after the release, unless specifically exempted under the law. For releases of other substances, a person is considered legally responsible if the substance discharged was under the control of the person at the time of the discharge or release or if the person was an owner or operator of the storage tanks and/or tank facility at the time the release occurred. If you believe that you are not legally responsible for this storage tank facility release, please contact the project manager listed below.

Request to Take Corrective Action

The MPCA requests that you take steps to investigate and, if necessary, clean up the release(s)/contamination in accordance with the enclosed MPCA fact sheets. The site investigation must fully define the extent and magnitude of the soil and/or ground water contamination caused by the release(s)/contamination. For petroleum release sites, the MPCA has facts sheets that will help you or your consultant properly investigate the release and report the results to the MPCA. Unless your site is considered "high priority" (see below), you must submit a report to this office which details the results of the investigation or concludes that excavation was sufficient to clean up the release within 10 months of the date of this letter. The MPCA reserves the right to reject proposed corrective actions if the requirements of the site investigation have not been fulfilled. Refer to the following web site for related guidance documents and information, http://www.pca.state.mn.us/programs/lust_p.html. For sites contaminated by pollutants other than petroleum, the MPCA requests that you or your consultant contact the MPCA project manager listed to discuss the investigation and reporting timeline that will be required for your site.

The MPCA considers sites with "free product" (free-floating petroleum), that have affected or that threaten to affect drinking water supplies, sites where pollutants are being released to surface waters such as lakes or wetlands, sites where petroleum or other vapors have been detected within structures or that pose fire or explosion hazards, to be high priority for staff review. If one or more of these situations apply to your petroleum or non-petroleum facility, a Remedial Investigation/Corrective Action Design report (refer to guidance documents) must be submitted within 90 days. The MPCA reserves the right to reject proposed corrective actions if the requirements of the site investigation have not been fulfilled. In addition, if you know or discover that there is free product in a well, excavation, or borehole, you must notify the MPCA within 24 hours and IMMEDIATELY begin interim free product recovery (refer to guidance documents). If you have any question with regard to whether your site is "high priority" please contact the MPCA project manager listed below.

RECEIVED

AUG 12 2004

MPCA - BRAINERD
BAXTER, MN

August 11, 2004

Reimbursement for petroleum sites:

In 1987, the legislature established the Petroleum Tank Release Compensation Fund (Petrofund) to reimburse some responsible persons and volunteers (property owners not responsible for releases) who take corrective action for a portion of their costs. The Petrofund is administered by the Petroleum Tank Release Compensation Board (Petro Board), which is part of the Minnesota Department of Commerce. If the release at your site is a petroleum release, the MPCA encourages you to learn more about the Petrofund reimbursement program by contacting Petrofund staff at 651/215-1775 or 1/800-638-0418 (in greater Minnesota only), or by reviewing the information that is available at the following website, http://www.pca.state.mn.us/programs/lust_p.html. Because there are rules governing eligible costs of cleanup, the MPCA strongly encourages you to familiarize yourself with the enclosed proposal and invoice forms and the other program requirements in order to maximize the available reimbursement. Please note that final decisions regarding the amount of reimbursement are made by the Petro Board, not the MPCA.

If you have not already done so, the MPCA recommends that you hire a qualified environmental consulting firm to help you investigate and clean up the contamination on your site. To be qualified, the consultant should have experience in performing investigations of contaminated sites and in developing and implementing corrective actions. For petroleum investigations, the consultant must be registered with the Petro Board if you wish to have your costs considered for reimbursement. A list of registered contractors is available from the Petrofund staff. Please note that, under the Petro Board's rules, (see Minn. R. ch. 2890), you must solicit a minimum of two written competitive consultant proposals on a form prescribed by the Petro Board to incur costs eligible for reimbursement, and a minimum of two written competitive contractor bids must also be obtained for each contractor service. Again, the MPCA strongly encourages you to contact Petrofund staff for answers to all of your questions about bidding and the other Petrofund reimbursement program requirements.

Required Response

The MPCA requires that you respond to this letter within 30 days to indicate whether you intend to proceed with the requested work. If you do not respond within this time frame, the MPCA will assume that you do not intend to comply, in which case the MPCA Commissioner may issue you an enforceable order that will require you to take corrective action. Failure to cooperate with the MPCA in a timely manner may result in reduced reimbursement from the Petro Board, see Minn. R. ch. 2890. If you do not cooperate, the MPCA has the option of taking the corrective actions on your behalf and recovering its costs from you.

If you have any questions concerning this letter or need additional information, please contact me at 218-828-6072. Please reference the above LEAK # in all correspondence. If you are calling long distance, you may reach the MPCA by calling 1-800/657-3864.

Sincerely,

Jason Lindquist
