RE: Implementation Report Request  
Site: South Central Grain & Energy, 212 Bryant Avenue, Hector, MN 55342  
Site ID#: LEAK00017141

Dear Mr. Filzen:

On April 24, 2009, the Minnesota Pollution Control Agency (MPCA) staff issued an "Approval of Voluntary Response Actions for Petroleum Contamination" for the above referenced site. Approval assumed that an implementation report would be provided to the MPCA summarizing the voluntary cleanup work once completed.

A recent review of our files indicates that we did not receive the implementation report as required. Please submit the requested report or respond in writing regarding the status of response actions taken for petroleum contamination at the Site. If your response is not received within 30 days after receipt of this letter, PBP staff will assume you do not intend to submit the implementation report. In this event, DRAP approval may be revoked and the MPCA may pursue additional actions as appropriate to protect public health and the environment. If the above development did not occur please inform MPCA PBP staff so that we may update our records.

If you have questions regarding this letter, please call me at 651-757-2425. Otherwise, I look forward to receiving your reply.

Sincerely,

Stacey Hendry-Van Patten  
Project Leader  
Petroleum Remediation Section  
Remediation Division
