RE: Petroleum Contaminated Soil-No Treatment App/Disposal Documentation Received
Site: South Central Grain & Energy, 212 Bryant Avenue, Hector
Site ID#: LEAK00017141

Dear Mr. Filzen:

The Minnesota Pollution Control Agency (MPCA) Petroleum Remediation Program (PRP) staff has received the *Corrective Action Excavation Report Worksheet* dated June 14, 2010, submitted for the above referenced site by your consultant, Glacial Lakes Environmental Consulting, Inc. The report was prepared as a result of the surficial soil corrective action approval issued by the MPCA PRP staff on January 30, 2009, and implemented by you on May 4, 2009. As part of the corrective action approval, documentation of soil treatment and/or proper disposal was required. In addition, proper soil treatment and/or disposal was required for petroleum contaminated soil excavated as part of the Petroleum Brownfields Program (PBP) approved Response Action Plan (RAP) dated April 24, 2009.

PRP Approved CAD:

In order for the MPCA staff to move your file toward closure, within 30 days, please provide the following documentation to address the 110 cubic yards of surficial petroleum contaminated soil excavated at this site:

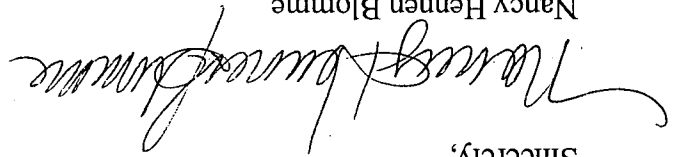

- Photo document the stockpiled soil showing adequate run-on and run-off controls.
- A site map showing the location of the stockpiled soil.
- A letter from the Renville County Landfill outlining the expected completion date of the new pod construction and their intent to accept the 110 cubic yards petroleum contaminated soil from this site upon completion of the pod.
- If the Renville County Landfill is unwilling to provide the above mentioned letter, an alternative soil treatment or approved disposal option must be provided within the 30-day deadline.
- The stockpile must be made accessible and soil treatment/disposal must be completed no later than September 30, 2010.
- Failure to comply with this requirement may result in Petrofund reductions and/or enforcement action taken against you by the MPCA.
- Submit PRP soil documentation directly to Nancy Hennen Blomme, MPCA-Marshall.

PBP Approved RAP:

- Provide the same documentation listed above (volume, photo documentation, and site map) for the petroleum contaminated soil excavated as part of the PBP approved RAP dated April 24, 2009.
- Submit PBP soil documentation directly to Stacey Hendry-Van Patten, MPCA-St. Paul.

Please refer to MPCA guidance documents for information regarding proper petroleum contaminated soil treatment required at petroleum release sites. If you have any questions concerning this letter or need additional information, please contact Nancy Hennen Blomme at 507-476-4260 or Stacey Hendry-Van Patten at 651-757-2425.

Sincerely,

Nancy Hennen Blomme
