Nancy -

Your are correct, once the excavation has been successfully completed and documented we'll be able to close the site. Also, please use your correct phone # in the letter and not the one I used.

John

Hi John

This approach looks good. I'll watch for the file and then get the Surficial Soil CAD approval letter sent out. There is only one thing that I need you to clarify: you hint at this being the last thing that needs to be completed prior to closure but you don't come right out and say that once the surficial soil CAD has been implemented the file can be closed. Am I interpreting your review correctly?

Thanks John and talk to you soon,

Nancy
