Thank you for the update. Please don't just send me weight tickets, though. I prefer to get something on landfill letterhead with the following information:

Identify generator (i.e. L#11924 Union Coop Oil, Cosmos), volume or weight received, date received, and what the landfill did with the soil (i.e. daily cover). I would need one for each of the two leak sites.

If the landfill won't provide this for you, please create a Glacial Lakes generated cover letter which includes this information for each of the two leak sites and attach the appropriate weight tickets prior to submittal to me.

Thanks Terry!

Nancy

Nancy,

Soil disposal was completed at both the Hector (110 yds<sup>3</sup>) and Cosmos (60 yds<sup>3</sup>) sites last Thursday and Friday. Soil was disposed of at the Spruce Ridge Landfill in Biscay, MN. I have requested copies of the scale tickets and will forward upon receiving them. Let me know if you have any questions.

Thanks

Hi Terry

My most recent email update from you on this was dated September 7<sup>th</sup>. In that correspondence you indicated that you were waiting for a commitment from the hauling contractor. The season for soil treatment/disposal is quickly coming to an end and this must be taken care of this year. Please send an update regarding the soil issue as soon as possible.

I look forward to getting this soil issue resolved soon. Thanks,

Nancy
