Terry

I spent some time with Zach at the landfill yesterday.

The bottom line is- still very limited room to work and construction schedule falling behind due to weather. We see no way to place even a limited amount of contaminated soil on the liner for at least a month – maybe longer if the weather does not cooperate.

I know you were counting on us as a cost effective way to dispose of the soil, but it doesn't look feasible at this time.

Nellie, at the landfill, said she suggested Spruce Ridge as a possible site within easy hauling distance.

I am sorry things didn't work out.
