RE: Completion of Land Treatment Soil Monitoring Requirements/ Petroleum Tank Release Site
File Closure
Site ID#: LEAK00001940

Dear Mr. Ewert and Mr. Weis:

On October 22, 1998, the Minnesota Pollution Control Agency (MPCA) issued a letter of approval for land treatment of petroleum-contaminated soil excavated from the site referenced above. The approval letter specified that additional follow-up monitoring of the land-treated soil is required at the land treatment sites.

The MPCA staff has received and reviewed the monitoring results for soil samples collected at the land treatment sites. The results indicate that the soil has been adequately treated. Therefore, no further follow-up soil monitoring and tillage are required for this soil.

Be please be aware that this letter also closes the MPCA file for the above-referenced petroleum tank release site, as explained in the No Further Work Required at Leak site/Off-Site Analysis Required at Land Application letter dated November 30, 1998.

Please contact me at (507)285-7302, if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Livingston".
