Permit Portal: Air

2/7/2018

Comment:

Mining so near to a world-class national (and international!) treasure should be a crime. The permanent damage this sort of mining will certainly do to our state's natural resource gem should not be allowed: if this company shuts down and moves- it is the people of Minnesota who will have to clean up this mess- for GENERATIONS (if it's even possible to clean up at all). NO to PolyMet's permit to mine. Yes to clean air and the future of clean and pristine air and water in Minnesota.
