**Comment:**

I am 100% opposed to the Polymet mine. After the company is finished mining the citizens of Minnesota will be left with the degraded land and the pollution that will go for perpetuity. No mining company can ever put enough money aside for the treatment of polluted water runoff that will go on for ever. When the mining company has made their profits they will leave the state, change their name, file for bankruptcy and keep their profits. A few years employment for a few miners for an eternity of pollution is plainly wrong.
