1.0 Summary

Landmark Environmental, LLC (Landmark) was retained by Opus Development Company, L.L.C. (User) to complete this Phase I Environmental Site Assessment (ESA) of multiple mixed commercial and residential parcels located at 1300 to 1322 5th Street SE and 425 14th Avenue SE in the City of Minneapolis (City), Hennepin County (County), Minnesota (herein, collectively referred to as the “Property”) for the purposes of satisfying the U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. Landmark was also retained by the User to complete this Phase I ESA for the purposes of understanding potential environmental conditions that could materially impact the operation of business associated with the Property and understanding environmental conditions of the Property to aid in the decision-making processes relating to a commercial real estate transaction in accordance with the American Society for Testing and Materials (ASTM) Practice E 1527-05 (Practice) and the Master Services Agreement between Opus Holding, L.L.C. and Landmark. With the exception of the limitations described in Sections 2.0, 6.0, and/or 11.0 of the Report, no deviations from the Practice were intentionally made. The User intends to purchase the Property for redevelopment for mixed use.

For the ease of discussion, the Property has been divided into seven parcels based on their tax parcel address: Parcel 1300, Parcel 1308, Parcel 1312, Parcel 1316, Parcel 1320, Parcel 1322, and Parcel 425. The Property location is shown on the figure in Appendix 16.1. The Property layout with is shown on the figure in Appendix 16.2.

The Property is currently used for mixed residential and commercial uses. Multi-family residential homes with small commercial store-fronts are located on Parcels 1308 and 1312. Commercial uses on the Property include pay-to-park surface parking lots (Parcels 1300, 1308, 1312, 1316, 1320, and 1322), a small barber shop (Parcel 1312), pizza restaurant (Parcel 1308), and a grocery, book store, and guitar store (Parcel 425). These current uses of the Property are not likely to involve the use, treatment, storage, disposal or generation of significant quantities of hazardous substances or petroleum products.

The Property supports four structures:

- Parcel 1308 supports a two-story mixed residential apartment and commercial building (Building 1308) with a basement.

- Parcel 1312 supports a two story mixed residential apartment and commercial building (Building 1312) with a basement.
- Parcel 1320 supports a small parking attendant structure (Building 1320).
- Parcel 425 supports a one-story multi-tenant commercial building (Building 425) with a basement.

The Property was originally developed as early as 1884/1885 for residential use. Residential structures (some with associated outbuildings/garages) were depicted on each of the seven Parcels. Beginning in 1906, Parcel 425 supported a commercial building with four to five adjoining store fronts (and basements). In addition, small commercial additions were constructed on Buildings 1308 and 1312 in later years. Commercial uses on Parcels 1308, 1312, and 425 generally consisted of the following: restaurants; grocery stores; jewelers; book stores; and guitar, shoe repair, barber and tailor shops. In addition, dry cleaners were identified at Parcel 425 in the 1930, 1952, and 1957 city directories. Former buildings located on Parcels 1300, 1316, 1320, and 1322 were demolished or removed. The source of the fill material used to fill the basements of the residential homes is unknown. Parcels 1300, 1316, 1320, and 1322 were redeveloped for use as commercial surface parking lots.

A regulatory records review for the Property was obtained from Environmental Data Resources, Inc. (EDR) on January 18, 2013. The regulatory report is in Appendix 16.5. The Property was not identified in the ASTM-defined regulatory lists searched by EDR. However, Property addresses were identified in the “EDR US Hist Cleaners” list, a proprietary list that identifies possible historical dry cleaner sites based on EDR’s review of historical city directories. In addition, based on the EDR report, the Property is located in an area of heavily impacted sites that have the potential to impact the groundwater, and/or soil vapor at the Property.

Based upon the records review, Property reconnaissance, and interviews, the following known or suspect environmental conditions were identified for the Property:

Finding: Historical Property buildings potentially utilized fuel oil for heating, including that which was documented in building records for the former building on Parcel 1300. Three fill/vent pipes possibly related to a fuel oil tank were observed on the southeast adjacent property, near the corner of Building 425 during the recent reconnaissance.

Finding: Historical commercial use at Parcel 425 included the documented presence of dry cleaners in the 1930, 1952, and 1957 city directories.

Finding: Likely presence of fill material of unknown origin based on urban setting and in former basements of historical buildings.

Finding: Documented and potential contamination on adjacent and/or upgradient regulatory-listed and historical sites.

Because the identified future use of the Property includes redevelopment for residential use and involves extensive earthwork activities, the aforementioned findings **are** considered to constitute recognized environmental conditions (RECs).

Finding: Potential presence of asbestos-containing materials in Property buildings.

Although **not** considered to constitute a REC by definition, this finding does constitute a business risk for the future use of the Property. Asbestos, lead-paint, and hazardous building material surveys are required prior to any demolition or renovation activities.

2.0 Introduction

Landmark Environmental, LLC (Landmark) completed a Phase I Environmental Site Assessment (ESA) of multiple mixed commercial and residential parcels located at 1300 to 1322 5th Street SE and 425 14th Avenue SE in the City of Minneapolis (City), Hennepin County (County), Minnesota (herein, collectively referred to as the “Property”). The Property location is shown in Appendix 16.1. Landmark performed this Phase I ESA and prepared this Phase I ESA report (Report) in general conformance with the U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule, the American Society for Testing and Materials (ASTM) Practice E 1527-05 (the Practice), and Opus Development Company, L.L.C. (User)-specific requirements.

2.1 Purpose

Landmark was retained by the User to complete this Phase I ESA for the purposes of satisfying the AAI Final Rule requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. Landmark was also retained by the User to complete this Phase I ESA for the purposes of understanding potential environmental conditions that could materially impact the operation of business associated with the Property and understanding environmental conditions of the Property to aid in the decision-making processes relating to a commercial real estate transaction in accordance with the Practice and the Master Services Agreement between Opus Holding, L.L.C. and Landmark.

2.2 Detailed Scope of Services

This Phase I ESA consisted of reviewing readily ascertainable and reasonably reviewable regulatory and land use information, as well as conducting a physical Property reconnaissance and Property representative and local government interviews. Evaluation of available information was used to determine if evidence exists that indicates the release of hazardous substances, hazardous materials or petroleum products to the Property. Any deviations from the standards, guidelines, or requirements presented in the AAI Final Rule, the Practice, and/or User-specific requirements are discussed in Sections 2.4, 6.0, and/or 11.0 of this Report. In addition, the scope of the ESA will included a visual inspection for the presence of asbestos-containing materials (ACM) in the Property buildings.

The scope of this Phase I ESA did **not** involve the collection and analysis of any type of sample or survey with respect to the following: matters of structural engineering; compliance with environmental regulations; compliance with industrial hygiene and/or health and safety programs; ACM, lead-based paint (LBP), or any other potentially hazardous building material; presence of radon and/or radionuclides; lead in drinking water; presence of wetlands; presence of cultural, historic, and/or ecological resources and/or endangered species; quality of indoor air; biological agents; mold; potential for earthquakes and/or flooding; presence of high voltage powerlines; or regulatory compliance.

2.3 Significant Assumptions

Landmark assumes that the information provided by the User, regulatory database provider, and regulatory and public agencies is true and reliable. No additional significant assumptions were made with respect to the Property.

2.4 Limitations and Exceptions

The findings, opinions, and conclusions in this Report are subject to the following data limitations:

- The following areas of the Property were not accessible or not inspected during the Property reconnaissance:
 - The ground surface was partially obscured by snow during the Property reconnaissance.
 - Vegetative stress could not be assessed due to the season.
 - The roof of the Property buildings.
 - The residential apartment units.
- Commercial tenant spaces were available for inspection; however, the representative for the commercial tenant located at 1312 5th Street SE was not present during the Property reconnaissance and the commercial tenant representatives for The Podium and The Bookhouse were not interviewed per the request of the building owner.
- Residential tenants were not interviewed.

Based on available information, these limitations do not represent significant data gaps and are not expected to impact the conclusions presented in this Report.

2.5 Special Terms and Conditions

The purpose of the Report is to aid in the environmental assessment of the Property and not to evaluate the structural condition of the buildings or other features of the Property. Except as identified in Sections 2.3 and 2.4 above or as described in Section 11.0, no intentional deviations from the Practice were made in preparing the Report.

Landmark has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession under similar budget and time constraints. Landmark assumes responsibility for its own observations and statements made in this Report, along with its interpretation of the information gathered. No other warranty is made or intended.

Since Landmark was not retained to verify information, Landmark assumes no responsibility for the accuracy of information that it obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Property, and vendors of public data. To the extent that Landmark does not identify contamination or potential sources of contamination to the Property in the Report, Landmark's conclusions in the Report are not representations that the Property is free of contamination. Performance of the Practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions (RECs) in connection with the Property, recognizing reasonable limits on time and cost. RECs indicate the presence or likely presence of any hazardous substances or petroleum products on the Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the Property or into ground, groundwater, or surface water of the Property. Under no circumstances can Landmark represent or warrant that hazardous or toxic materials do not exist on the Property.

2.6 User Reliance

The Report was prepared for the exclusive use of User. As defined by the Practice, no others may rely on the Report without the User's and Landmark's written permission. Landmark owes no duties of care or otherwise to anyone other than the User and makes no warranties to anyone other than the User.

3.0 Property Description

For ease of discussion, the references listed in Section 13.0 are numbered for use throughout the Report.

3.1 Location and Legal Description

The Property is comprised of seven contiguous tax parcels located at 1300 to 1322 5th Street SE and 425 14th Avenue SE, Minneapolis, Minnesota in the Southeast Quarter of Section 24 in Township 29 North, Range 24 West. For the ease of discussion, the Property has been divided into seven parcels based on their tax parcel address: Parcel 1300, Parcel 1308, Parcel 1312, Parcel 1316, Parcel 1320, Parcel 1322, and Parcel 425. The Property location is shown on the figure in Appendix 16.1. The Property layout with is shown on the figure in Appendix 16.2. The legal description of the Property is as follows:

Parcel 1300

Tax Parcel Identification Number (PIN): 24-029-24-42-0028

Tax Parcel Address: 1300 - 5th Street SE

Parcel size: 7260 square feet

Legal Description: The northeasterly 110 feet of Lot 5, Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

Parcel 1308

PIN: 24-029-24-42-0027

Tax Parcel Address: 1308 - 5th Street SE

Parcel size: 7260 square feet

Legal Description: The northeasterly 44 feet of Lot 4, Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

Parcel 1312

PIN: 24-029-24-42-0026

Tax Parcel Address: 1312 - 5th Street SE

Parcel size: 7260 square feet

Legal Description: The northeasterly 22 feet of Lot 3, and the southeasterly 22 feet of Lot 4, Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

Parcel 1316

PIN: 24-029-24-42-0025

Tax Parcel Address: 1316 - 5th Street SE

Parcel size: 7260 square feet

Legal Description: The southeasterly 44 feet of Lot 3, Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

Parcel 1320

PIN: 24-029-24-42-0023

Tax Parcel Address: 1320 - 5th Street SE

Parcel size: 5445 square feet

Legal Description: The northeasterly 33 feet of Lot 2, Block P, Tuttle's Addition to St. Anthony (Reference 4)

Parcel 1322

PIN: 24-029-24-42-0024

Tax Parcel Address: 1322 - 5th Street SE

Parcel size: 4070 square feet

Legal Description: The southeasterly 33 feet of Lot 2, except that part of the southeasterly 22.5 feet of Lot 2 lying southwesterly of the northeasterly 85 feet of said Lot 2, all in Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

Parcel 425

PIN: 24-029-24-42-0021

Tax Parcel Address: 425 - 14th Avenue SE

Parcel size: 5185 square feet

Legal Description: That part of the northeasterly 85 feet of Lot 1 lying northwesterly of the southeasterly 61 feet thereof, Block P, Tuttle's Addition to St. Anthony (Reference 4, 15)

3.2 Property and Vicinity General Characteristics

According to tax assessor records, the Property, consisting of a total of approximately 1.0 acre of land, is currently owned by the following parcel owners:

- Parcel 1300: Emjuno Investment Company
- Parcels 1308 and 1312: Susan Chilgren Duffy
- Parcels 1316, 1320, 1322: Bauer Real Properties LLC
- Parcel 425: Perry D Bauer

The Property is located in a mixed residential and commercial area of the City known as "Dinkytown", located near the University of Minnesota Minneapolis Campus. The

general Property vicinity has been developed for this general type of land use since late-1800s/early-1900s.

3.3 Current Use of the Property

The Property is currently used for mixed residential and commercial uses. Multi-family residential homes with small commercial store-fronts are located on Parcels 1308 and 1312. Commercial uses on the Property include pay-to-park surface parking lots (Parcels 1300, 1308, 1312, 1316, 1320, and 1322), a small barber shop (Parcel 1312), pizza restaurant (Parcel 1308), and a grocery, book store, and guitar store (Parcel 425). These current uses of the Property are not likely to involve the use, treatment, storage, disposal or generation of significant quantities of hazardous substances or petroleum products. Current Property features are shown on Figure 2.

3.4 Descriptions of Structures, Roads, Other Improvements

The Property supports four structures:

- Parcel 1308 supports a two-story mixed residential apartment and commercial building (Building 1308) with a basement. Building 1308 (5,440 square feet in size) is constructed of wood, heated by natural gas, and connected to municipal water and sanitary sewer.
- Parcel 1312 supports a two story mixed residential apartment and commercial building (Building 1312) with a basement. Building 1312 (4,538 square feet in size) is constructed of wood, heated by natural gas, and connected to municipal water and sanitary sewer.
- Parcel 1320 supports a small parking attendant structure (Building 1320). Building 1320 (less than 25 square feet in size) is constructed of wood, has electrical heat, and is not connected to utilities.
- Parcel 425 supports a one-story multi-tenant commercial building (Building 425) with a basement. Building 425 (10,110 square feet in size) is constructed of concrete block, heated by natural gas, and connected to municipal water and sanitary sewer.

Asphalt paved parking lots generally cover the remaining portions of the Property. The Property is bordered by 13th Avenue SE on the northwest, 5th Street SE on the northeast, and 14th Avenue SE on the southeast.

3.5 Current Uses of Adjoining Properties

The Property is bordered by the following adjoining properties:

- The Chateau, a large residential apartment building with limited commercial retail/office tenants on the street level to the northwest, across 13th Avenue SE;
- A surface parking lot to the north, across the intersection of 13th Avenue SE and 5th Street SE;
- The University Technology Center (former high school) to the northeast, across 5th Street SE;
- Residential apartment building to the east, across the intersection of 5th Street SE and 14th Avenue SE;
- Commercial retail (including a Subway and Pizza Hut restaurant and a yoga studio) to the southeast, across 14th Avenue SE;
- Commercial retail (including Wally's and Kafe 421 restaurants and vacant tenant space) to the southwest, adjoining Parcel 421; and
- A residential home and commercial retail buildings (including restaurants, a bar, tobacco store, etc) with associated off-street surface parking lots to the southwest, bordering the southwest Property line.

Observed current uses of surrounding properties are not likely to involve the use, treatment, storage, disposal or generation of significant quantities of hazardous substances or petroleum products.

Properties to the east, west, north, and south are topographically level with the Property.

4.0 User-Provided Information

For preparation of this Report, the User provided (or contracted with Landmark to provide) the following information with regard to the Property.

4.1 Title Records

A title records search was not provided by the User for this Phase I ESA. The User did not contract with Landmark to provide a title records search as part of the scope for this Phase I ESA. The User provided a Title Survey map that depicted existing title commitments for the Property.

4.2 Environmental Liens or Activity and Use Limitations

The User indicated no knowledge of environmental liens for the Property.

4.3 Specialized Knowledge

Specialized information provided by the User is included throughout the applicable sections of the Report.

4.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information available within or known throughout the local community with regard to the environmental condition of the Property is included throughout the applicable sections of the Report.

4.5 Valuation Reduction for Environmental Issues

The User did not report knowledge of such a value reduction.

4.6 Owner, Property Manager, and Occupant Information

The User provided contact information for the following Property owner representatives:

- Parcel 1300: Mr. Steve Scallen
- Parcels 1308 and 1312: Ms. Susan Duffy (Ms. Duffy referred Landmark to her spouse, Mr. Pat Duffy, for interview and Parcel access)
- Parcels 1316, 1320, 1322, and 425: Mr. Perry Bauer (Mr. Bauer referred Landmark to his spouse and Parcel manager, Ms. Laurel Duffy, for interview and Parcel access)

These representatives were interviewed regarding their knowledge of current and historic Property uses; information obtained during those interviews is used throughout applicable sections of the Report and summarized in Section 7.0.

4.7 Reason for Performing Phase I

The User intends to purchase the Property for redevelopment for mixed use.

4.8 Other Information—Such as Previous Assessments or Investigations

The User provided a site survey map; no other additional information was provided by the User for the Property.

5.0 Records Review

Records reviewed for preparation of this Phase I ESA are listed in Section 13.0. The results of that review are described in this section.

5.1 Standard Environmental Record Sources

A regulatory records review for the Property was obtained from Environmental Data Resources, Inc. (EDR) on January 18, 2013. The regulatory report is in Appendix 16.5. Where possible, duplicate database listings in the EDR report were removed from the following regulatory review and are not discussed further.

The Property was not identified in the ASTM-defined regulatory lists searched by EDR. However, Property addresses were identified in the “EDR US Hist Cleaners” list, a proprietary list that identifies possible historical dry cleaner sites based on EDR’s review of historical city directories. Pertinent listings from this database and Landmark’s historical document review are discussed in Section 5.4.

The EDR report provided a list of sites that were unable to be located due to poor address information (orphan summary). These listed orphan sites were reviewed and generally located. Those found to be located within applicable ASTM search distances are included in the tally below.

Sites identified within the search radii defined by the Practice are as follows (where possible, duplicate database listings in the EDR report were removed from the tally):

<u>1</u>	Federal National Priority List (NPL) site list (≤ 1.0 miles).
<u>0</u>	Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list (≤ 0.5 miles).
<u>1</u>	Federal CERCLIS No Further Remedial Action Planned (NFRAP) site list (≤ 0.5 miles)
<u>1</u>	Federal Resource Conservation and Recovery Act (RCRA) non-Corrective Action Sites (CORRACTS) Transfer, Storage, and Disposal (TSD) Facility (≤ 0.5 miles).
<u>6</u>	Federal RCRA CORRACTS list (≤ 1.0 miles).
<u>5</u>	Federal RCRA generators list (Property and adjoining properties).
<u>0</u>	Federal Emergency Response Notification System (ERNS) list (Property only).
<u>8</u>	State list of hazardous waste sites identified for investigation or remediation (NPL or CERCLA equivalent sites) (≤ 1.0 miles).
<u>29/5</u>	State Voluntary Investigation & Cleanup Program/Petroleum Brownfield sites (≤ 0.5 miles).
<u>1</u>	State landfill and/or solid waste disposal site lists (≤ 0.5 miles).
<u>26/2</u>	State leaking underground storage tanks/leaking above-ground storage tanks (LUST/LAST) lists (≤ 0.5 miles).
<u>2/0</u>	State registered underground storage tanks/above-ground storage tanks (UST/AST) list (Property and adjoining properties).

Based on the EDR report, the Property is located in an area of heavily impacted sites that have the potential to impact the groundwater, and/or soil vapor at the Property.

5.2 Additional Environmental Record Sources

No known previous environmental assessments and/or investigations were conducted at the Property or portions thereof.

5.3 Physical Setting Sources

Surface elevations of the Property range from 830 to 840 feet above mean sea level (Reference 9). Less than 50 feet of unconsolidated sediments consisting of sand, gravelly sand, and loamy sand underlie the Property. According to published geological information, these deposits are often covered by thick artificial fill in areas of heavy development. The uppermost bedrock unit consisting of the Platteville and Glenwood Formations is present at an approximate depth of less than 50 feet beneath the Property. (Reference 11)

Shallow groundwater is anticipated to be present beneath the Property at a depth of 30 to 40 feet (Reference 11). The anticipated groundwater flow direction is southwest towards the Mississippi River, the nearest likely discharge zone (Reference 11). The nearest surface water body is the Mississippi River located approximately ¼ mile from the Property (Reference 9).

5.4 Historical Use Information on the Property

Landmark reviewed the following historical information sources as part of this Phase I ESA: aerial photographs; historical atlases and topographic maps; Sanborn fire insurance maps; reverse city directories; City and County files; and Property Owner interviews.

A historical map, dated 1854, shows the Property and surrounding area to be comprised of a large wetland area. (Reference 4)

The Property was originally developed as early as 1884/1885 for residential use. Residential structures (some with associated outbuildings/garages) were depicted on each of the seven Parcels (Reference 2, 6). Building 1308 and 1312 are the original structures built in the late-1800s; however, additions and renovations throughout the years resulted in the conversion to multiple residential apartment units and the addition of small commercial store fronts to these original residential structures. The residential structure on Parcel 1300 was identified as a fraternity house as early as 1906. (Reference 6)

In 1892, Parcel 425 was vacant; beginning in 1906, Parcel 425 supported a commercial building with four to five adjoining store fronts (and basements) and an outbuilding (by 1912, the outbuilding was no longer present). (Reference 6, 14)

The residential homes located on Parcels 1316 and 1320 were wrecked and the residential home located on Parcel 1322 was moved offsite in 1973 (Reference 2, 14). According to the Parcel owner representative, Ms. Laurel Bauer, to the best of her recollection, the demolition debris was removed; however the foundations and slab basement floors were left in place. The source of the fill material used to fill the basements of the residential homes is unknown. Parcels 1316, 1320, and 1322 were redeveloped for use as a commercial surface parking lot.

The former commercial building located at Parcel 425 was also demolished in 1973 and Building 425, a new single-story commercial building with a full basement and multiple tenant spaces, was constructed. The new building (and basement area) was expanded to

encompass the entire Parcel; therefore, no filling was needed and the demolition debris was removed (Reference 2, 14).

In 1992, the residential structure located at Parcel 1300 was condemned and demolished. According to Parcel 1300 owner representative, Mr. Steve Scallen, the City constructed the parking lot prior to his acquisition of the Parcel in 1995. The source of backfill for the basement is not known. Because the reported work was conducted by the City, the potential exists for the fill soils to have originated from other City project sites located throughout the City.

Commercial uses were present on Parcels 1308, 1312, and 425. These uses generally consisted of the following: restaurants; grocery stores; jewelers; book stores; and guitar, shoe repair, barber and tailor shops. In addition, dry cleaners were identified at Parcel 425 in the 1930, 1952, and 1957 city directories. (Reference 2, 3, 4)

As depicted in the Sanborn maps, municipal water was available to Property vicinity since 1885 (the time of original development); it is likely sanitary sewer was also available at that time. No private water wells were identified on the Minnesota Department of Health (MDH), County Well Index (CWI) (Reference 10).

Building records for Parcel 1300 indicated multiple oil burner permits including one which identified the presence of a fuel oil tank located “outside” with a 2” fill pipe and a ¼” vent pipe in 1935 and one which identified the installation of two 265-gallon replacement tanks “inside” in 1949. Building records for other Parcels did not indicate the use of fuel oil for heating (Reference 2). Currently, with the exception of the parking attendant structure on Parcel 1320, the Property buildings utilize natural gas for heating.

5.5 Historical Use Information on Adjoining Properties

The general Property vicinity has been developed since prior to 1889 for mixed residential and commercial use. These uses generally consisted of the following: restaurants; grocery stores; jewelers; book stores; TV sales and service; and shoe repair, barber and tailor shops. In addition, dry cleaners were identified at 420 and 424 14th Avenue SE in the 1950s and at 1301 4th Street SE from 1946 to 1972. The Tub, a self-service laundromat, was identified at 423 14th Avenue SE; according to Ms. Bauer, this location did not conduct onsite dry cleaning operations. A filling station was identified at 1315 4th Street SE from 1930 to 1940. (Reference 2, 3, 4)

6.0 Property Reconnaissance

6.1 Methodology and Limiting Conditions

The Property reconnaissance was conducted by Jessica Fitzpatrick, a representative of Landmark, on January 31, 2013. Existing Property features are shown on the figure in Appendix 16.2; Property reconnaissance photographs are in Appendix 16.3. Mr. Pat Duffy and Ms. Laurel Bauer, Property owner/manager representatives were present during respective portions of the reconnaissance.

The following areas of the Property were not accessible or not inspected during the Property reconnaissance:

- The ground surface was partially obscured by snow during the Property reconnaissance.
- Vegetative stress could not be assessed due to the season.
- The roof of the Property buildings.
- The residential apartment units.

6.2 General Site Setting

The Property is located in a mixed residential and commercial area of the City known as “Dinkytown”, located near the University of Minnesota Minneapolis Campus. Access is unrestricted to pedestrian traffic; vehicular access to the Property is via 5th Street SE.

The following table summarizes the Property reconnaissance and interview findings. All items that currently are present at the Property are noted in the table. The table also notes whether or not the identified features are considered to be of potential environmental concern. Discussions of those that are considered to be of potential environmental concern are referenced. Features that are or were not identified to be present at the Property are not further discussed.

On-Site Features	Currently Present (Y/N)	Potential Environmental Condition (Y/N)	Report Section
Hazardous Substance/Petroleum Products	Y	N—Household quantities of cleaning and building maintenance chemicals.	6.4
Underground Storage tanks	N		
Aboveground Storage tanks	N		
Odors	N		
Air Emissions (stacks, hoods, etc.)	N		
Pools of Liquid	N		
Drums	N

6.3 Exterior Observations

Exterior portions of the Property are generally covered by asphalt parking and driveway areas. Basements of former residential structures formerly located on Parcels 1300, 1316, 1320, and 1322 were filled with soils/materials from unknown sources prior to being redeveloped for parking use.

Three pipes were observed on the southeast adjacent property corner, near the corner of Building 425. The purpose of the pipes is not known; however, the potential exists for these pipes to be fill/vent pipes for an underground storage tank or in-basement aboveground storage tank used to store fuel oil.

6.4 Interior Observations

The Property supports four structures:

- Parcel 1308 supports a two-story mixed residential apartment and commercial building with a basement. Building 1308 is constructed of wood, heated by natural gas, and connected to municipal water and sanitary sewer. The commercial portion of the building is located on the northeast side of the building, fronting 5th Street SE. This portion of the building is currently occupied by Duffy's Dinkytown Pizza, restaurant.
- Parcel 1312 supports a two story mixed residential apartment and commercial building with a basement. Building 1312 is constructed of wood, heated by natural gas, and connected to municipal water and sanitary sewer. The commercial portion of the building is located on the northeast side of the building, fronting 5th Street SE. This portion of the building is currently occupied by Casablanca Hair Design, barber shop.
- Parcel 1320 supports a small parking attendant structure. Building 1320 is constructed of wood, has electrical heat, and is not connected to utilities.

- Parcel 425 supports a one-story multi-tenant commercial building with a basement. Building 425 is constructed of concrete block, heated by natural gas, and connected to municipal water and sanitary sewer. Three tenants currently occupy this building: House of Hanson, grocery; The Podium, guitar sales and lessons; and The Bookhouse, used book store. All three tenant spaces have separate, full basement areas that are used as a sales floor or for merchandise storage.

Minimal household quantities of cleaning and building maintenance chemicals were observed to be stored/used in the Property buildings. Standard floor drains were observed in basement areas of the Property buildings. No sumps are present in the Property buildings and Property Owner representatives indicated there have been no issues with water in the basements.

Based on the age of the Property buildings, the potential for ACM exists and may include ceiling and wall board/texture, floor tiles, and miscellaneous materials. No pipe wrap was observed on the exposed piping in the basements of the Property buildings.

7.1 Interview with Owner

Parcel 1300 Owner Representative

Date of Interview: January 31, 2013

Staff Name: Mr. Steve Scallen

Years Familiar with Property: Since 1995

Telephone Number: 612-720-1501

Relevant information provided by Mr. Scallen was used throughout the Report. He is not aware of any documented releases to the Property or any environmental condition related to the Property or adjacent properties.

Parcel 1308 and 1312 Owner Representative

Date of Interview: January 31, 2013

Staff Name: Mr. Pat Duffy

Years Familiar with Property: 13-14 years

Telephone Number: 612-308-1353

Relevant information provided by Mr. Duffy was used throughout the Report. He is not aware of any documented releases to the Property or any environmental condition related to the Property or adjacent properties.

Parcel 1316, 1320, 1322, 425 Owner Representative

Date of Interview: January 31, 2013

Staff Name: Ms. Laurel Bauer

Years Familiar with Property: 50+ years

Telephone Number: 612-501-1807

Relevant information provided by Ms. Bauer was used throughout the Report. She is not aware of any documented releases to the Property or any environmental condition related to the Property or adjacent properties.

7.2 Interview with Property Manager

See above.

7.3 Interview with Occupants

See above owner-occupant interviews. Commercial tenant spaces were available for inspection; however, the representative for the commercial tenant located at 1312 5th Street SE was not present during the Property reconnaissance and the commercial tenant representatives for The Podium and The Bookhouse were not interviewed per the request of the building owner. Residential tenants were not interviewed.

7.4 Interviews with Local Government Officials

Local government records and interviews were provided by HIG, relevant information was used throughout the Report.

7.5 Interviews with Others

User Representative

Date of Interview: January 18, 2013

Staff Name: Mr. Matt Rauenhorst

Telephone Number: 952-656-4681

Relevant information provided by Mr. Rauenhorst was used throughout the Report. He is not aware of any documented releases to the Property or any environmental condition related to the Property or adjacent properties.

8.0 Findings

Based upon the records review, Property reconnaissance, and interviews, the following known or suspect environmental conditions were identified for the Property:

- Historical Property buildings potentially utilized fuel oil for heating, including that which was documented in building records for the former building on Parcel 1300. Three fill/vent pipes possibly related to a fuel oil tank were identified on the southeast adjacent property, near the corner of Building 425 during the recent Property reconnaissance.
- Historical commercial use at Parcel 425 included the documented presence of dry cleaners in the 1930, 1952, and 1957 city directories.
- Likely presence of fill material of unknown origin based on urban setting and in former basements of historical buildings.
- Documented and potential contamination on adjacent and/or upgradient regulatory-listed and historical sites.
- Potential presence of ACM in Property buildings.

9.0 Opinion

This section of the Report provides Landmark's rationale for concluding whether the findings are or are not considered to constitute RECs. As stated, RECs indicate the presence or likely presence of any hazardous substances or petroleum products on the Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the Property or into ground, groundwater, or surface water of the Property.

Finding: Historical Property buildings potentially utilized fuel oil for heating, including that which was documented in building records for the former building on Parcel 1300. Three fill/vent pipes possibly related to a fuel oil tank were observed on the southeast adjacent property, near the corner of Building 425 during the recent reconnaissance.

Finding: Historical commercial use at Parcel 425 included the documented presence of dry cleaners in the 1930, 1952, and 1957 city directories.

Finding: Likely presence of fill material of unknown origin based on urban setting and in former basements of historical buildings.

Finding: Documented and potential contamination on adjacent and/or upgradient regulatory-listed and historical sites.

Because the identified future use of the Property includes redevelopment for residential use and involves extensive earthwork activities, the aforementioned findings **are** considered to constitute RECs.

Finding: Potential presence of ACM in Property buildings.

Although **not** considered to constitute a REC by definition, this finding does constitute a business risk for the future use of the Property. Asbestos, lead-paint, and hazardous building material surveys are required prior to any demolition or renovation activities.

10.0 Conclusions

Landmark performed this Phase I ESA in January and February 2013 in general conformance with the EPA AAI Final Rule, the Practice, and User-specific requirements for the Property. Any exceptions to, or deletions from the EPA AAI Final Rule, the Practice, and User-specific requirements are described in Sections 2.0, 6.0, and/or 11.0 of this Report. This Phase I ESA revealed no evidence of RECs in connection with the Property for the specified Property use of the User, except for the following:

- Historical Property buildings potentially utilized fuel oil for heating, including that which was documented in building records for the former building on Parcel 1300. Three fill/vent pipes possibly related to a fuel oil tank were identified on the southeast adjacent property, near the corner of Building 425 during the recent Property reconnaissance.
- Historical commercial use at Parcel 425 included the documented presence of dry cleaners in the 1930, 1952, and 1957 city directories.
- Likely presence of fill material of unknown origin based on urban setting and in former basements of historical buildings.
- Documented and potential contamination on adjacent and/or upgradient regulatory-listed and historical sites.

11.0 Deviations

With the exception of the limiting conditions described in Sections 2.0 and 6.0 of this Report, all the EPA AAI Final Rule, the Practice, and User-specific requirements were met.

12.0 Additional Services

No non-scope considerations were addressed as part of this Phase I ESA.

14.0 Signatures of Environmental Professional(s)

Landmark performed this Phase I ESA in January and February 2013 in general conformance with the EPA AAI Final Rule, the ASTM Practice 1527-05, and User-specific requirements. Special terms, conditions, limitations and exceptions, and deviations that apply to this Phase I ESA are described in previous sections.

Environmental Professional

Environmental Professional

15.0 Qualification(s) of Environmental Professional(s)

We declare that the individuals that conducted this Phase I ESA and prepared this Report meet the definition of Environmental Professional as defined in §312.20 of 40 CFR 312.

Each member of the project team has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. Landmark has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Landmark's experience and the environmental professional(s) and project team qualifications' are included in Appendix 16.8.

*** Explanation of TOH**

"This Old House" (M.S. 273.11, Subd. 16): This applies only to homestead property with structures 45 years of age or older and valued at less than \$400,000. Improvements that increase the estimated market value by \$5,000 or more may some of the value exempted. **Only improvements made before Jan. 2, 2003, and first assessed before or during the 2003 assessment will qualify for this exclusion.** Value that has been deferred for 10 years will begin to be phased in with the 2004 assessment. More information on the is available at the Minneapolis Assessor's Office.

AGREEMENT

Made this 6 day of March, 1886 by and between
 the City of Minneapolis, by **WALTER S. PARDEE, Inspector**
 of Buildings, party of the first part, and Rev. J. A. Wright
 party of the second part, that for
 and in consideration of Building Permit No. **6062** to him in
 hand delivered by said party of the first part, said party of the
 second part agrees to do the proposed work in accordance with
 the description set forth in the application and statement hereto
 attached, and in the plans and specifications of which the said
 application and statement are a part, and according to the pro-
 visions of the ordinance entitled, "AN ORDINANCE TO REGU-
 LATE THE CONSTRUCTION, REPAIRS AND REMOVAL
 OF BUILDINGS IN THE CITY OF MINNEAPOLIS." Ap-

proved March 3d, 1884

							12/1/03	2,000. ⁰⁰	No. F No. D Engineer's Certificate No.

1 Repair alter foundation
1 brick veneer down house

Permission is hereby granted to Blecker et al. to repair the building foundation described in the above statement. This permit is granted upon the express condition that the person to whom it is granted, and his agents, employes and workmen, in all the work done in, around and upon said building, and any part thereof, shall conform in all respects to the ordinances of the City of Minneapolis, regarding the construction, alteration, repair and removal of buildings in the city limits; and this permit may be revoked at any time upon violation of any of the provisions of said ordinances.

Inspector of Buildings

AGREEMENT.

In consideration of the issue and delivery to me by the Inspector of Buildings of the City of Minneapolis, of Building Permit No. B. 57001 I hereby agree to do the proposed work in accordance with the description above set forth and according to the provisions of the ordinance entitled "An Ordinance to Regulate the Construction, Repair and Removal of Buildings in the City of Minneapolis" and amendments thereto.

NOTE: A permit is required for all electric, plumbing, gas, oil, ventilating, refrigeration, heating or plastering work. Such permit must be secured before any such work is started. This permit shall expire by limitation and become null and void if the building or work authorized by this permit is not commenced within 60 days, or if abandoned for 120 days. (The issuance of this permit does not imply or authorize the granting of any license.) The contractor shall keep streets and alleys reasonably clean of dirt and debris from his project. Failure to comply will result in the Minneapolis Street Department cleaning the area and billing contractor for labor and equipment involved.

APPLICANT CERTIFIES THAT ALL INFORMATION GIVEN IS CORRECT AND THAT ALL PERTINENT CITY ORDINANCES WILL BE COMPLIED WITH IN PERFORMING THE WORK FOR WHICH THIS PERMIT IS ISSUED.

The reproduction of R. L. Polk & Co. directories has been made in accordance with the terms and conditions of an agreement between Historical Information Gatherers, Inc. (HIGs), and R. L. Polk & Co. The directories may not be further reproduced without permission.

It's true our 122 year reputation is built on Furs...but we're also proud of our smashing collection of Boralba wraps, cloth coats, dresses and accessories.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/01/2012 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>VITASYN</i>	<i>2010 E HENNEPIN AVE STE</i>	<i>NE 1/2 - 1 (0.812 mi.)</i>	<i>0</i>	<i>7</i>

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 11/02/2012 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there are 6 CORRACTS sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/11/2012 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MCLAUGHLIN GORMLEY KING CO (MG)	1715 5TH STREET SOUTHEAST	ESE 1/4 - 1/2 (0.253 mi.)	M78	274

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 7 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The Superfund Site Information Listing records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Minnesota Pollution Control's Superfund Permanent List of Priorities.

A review of the SHWS list, as provided by EDR, and dated 01/11/2012 has revealed that there are 6 SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Minnesota Pollution Control's Permitted Solid Waste Disposal Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 11/01/2012 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal Brownfields sites

BROWNFIELDS: Purchasing, selling, or developing property can present a special set of obstacles if the property is contaminated with chemicals. The Petroleum Brownfields Program is one of several programs within the Minnesota Pollution Control Agency (MPCA) designed to help people address these obstacles. The purpose of the Petroleum Brownfields Program is to provide the technical assistance and liability assurance needed to expedite and facilitate the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum.

A review of the BROWNFIELDS list, as provided by EDR, and dated 09/30/2011 has revealed that there are 5 BROWNFIELDS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/11/2012 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 12 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

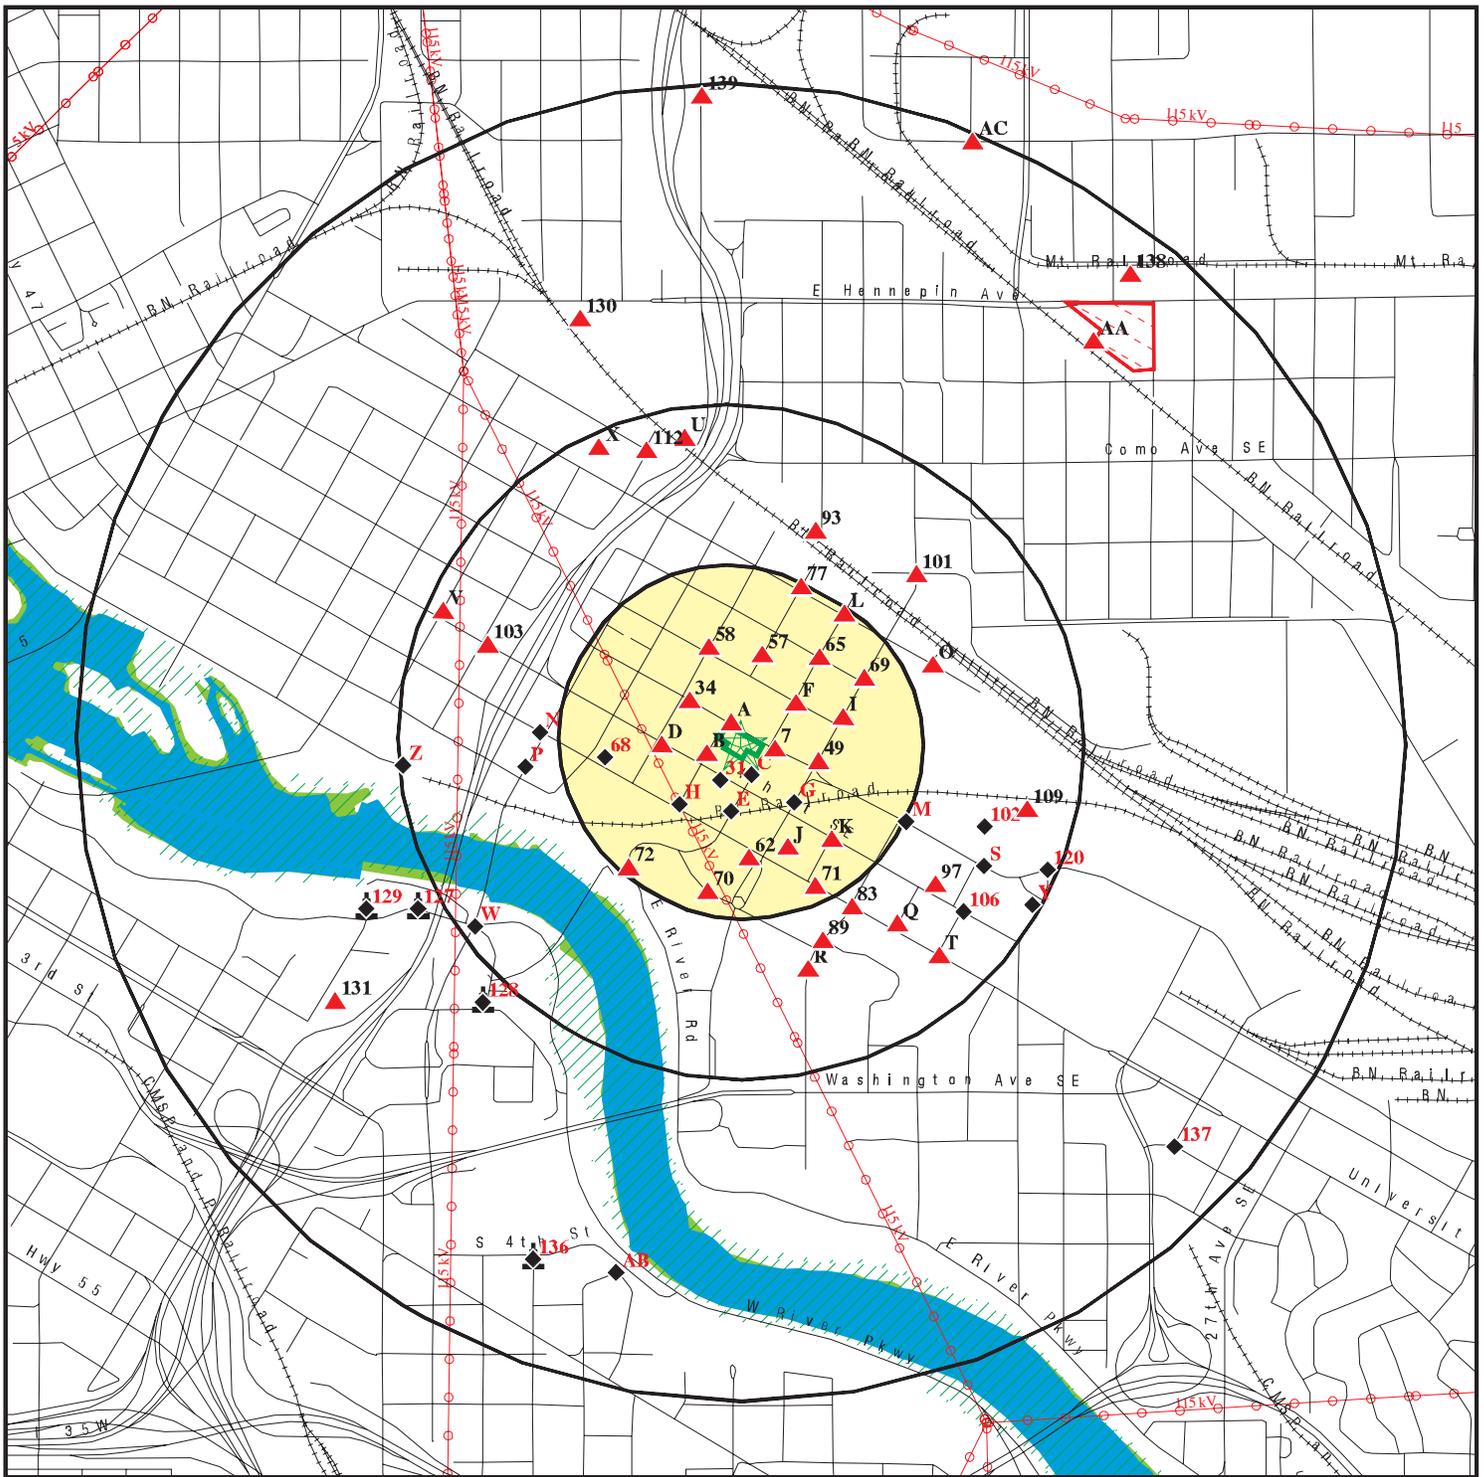

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 20 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 11/18/1980
Facility name: VITASYN
Site name: ZYTRON LTD LABORATORY
Classification: Not a generator, verified

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: P005
Waste name: ALLYL ALCOHOL

Waste code: P011
Waste name: ARSENIC OXIDE AS2O3

Waste code: P012
Waste name: ARSENIC OXIDE AS2O3

Corrective Action Summary:

Event date: 12/20/1985
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action at the facility or area referred to CERCLA.

Event date: 08/30/1991
Event: Date For Remedy Selection (CM Imposed)

Event date: 10/02/1992
Event: CA550RC

Event date: 09/30/1997
Event: Current Human Exposures under Control, More information is needed to make a determination.

Event date: 09/30/1997
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

Event date: 09/25/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 09/25/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Summary Details:

Conditions at listing September 1983): Henkel Corp. operates in an industrial and residential area of Minneapolis, Minnesota. Before selling the site to Henkel, General Mills Corp. operated a research laboratory there from about 1947 to 1962. During that time, General Mills disposed of about 1,000 gallons per year of laboratory solvents in a dry well to a depth of 10 feet. The State's analyses of soil, shallow ground water, and the deeper bedrock Prairie du Chien-Jordan aquifer detected volatile organic compounds. Both aquifers recharge the Mississippi River, from which Minneapolis obtains its drinking water. The Town of St. Anthony (population 8,000) obtains its drinking water from the Prairie du Chien-Jordanaquifer, but its wells are about 2.5 miles upgradient from the site. The State has been working with General Mills to complete the investigation and cleanup of the site. Status June 1984): The State is developing a Consent Order for General Mills to complete the investigation and cleanup of the site.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D018
Waste name: BENZENE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

Waste code: D001
 Waste name:

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110008670063

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: X002
Waste name: POLYCHLORINATED BIPHENOLS (PCBs)

Violation Status: No violations found

Registry ID: 110003730160

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Notes: The Site consists of four parcels: two (Juno Parcels) are located along 15th Street SE, the Dinky Dome Parcel and a fourth parcel owned by the University of Minnesota. The U of M parcel was also entered in VIC as the Doran (Lot 4) Site (VP24740). The four parcels were purchased by Doran University LLC for the purpose of renovating the Dinky Dome and construction of the Sydney Hall Student Residence. Site Description: Historically the one acre Site has been occupied since prior to the 1880 s with residential structures. The Dinky Dome was constructed in the southern part of the Site in 1913 and used as a Bible college until the 1970 s when it converted to retail usage. A building on the northern portion of the Site at the intersection of 15th Avenue SE and 4th Street SE was constructed in 1928, and has been in use until the present time as a restaurant. Residential dwellings occupying the remainder of the Site along 15th Avenue SW were demolished in the 1970s when most of the northern part of the Site was converted into a surface parking lot. A subsurface investigation was conducted in 2008, consisting of excavating five test pits, within the area occupied by the parking lot on the northern part of the Site. Fill containing debris was encountered to depths of 4 to 12 feet. Eleven soil samples were analyzed for selected compounds including volatile organic compounds VOCs, semi-volatile organic compounds (SVOCs), and Resource Conservation and Recovery Act (RCRA) metals. Selected samples of debris were analyzed for asbestos. Xylenes, toluene, SVOCs, arsenic, lead and mercury were detected in the soil samples. The benzo(a)pyrene equivalent of the carcinogenic polynuclear aromatic hydrocarbons and

arsenic concentrations were above the MPCA s Industrial Soil Reference Value, and the lead and mercury concentrations were above the Residential Soil Reference value. The Identified Release to soils consists of asbestos, SVOCs, arsenic, lead, and mercury. Petroleum impacted soil is under the oversight of the MPCA s Petroleum Brownfields Program. No soil samples were collected within the footprint of the Dinky Dome, on the southern part of the Site, and the restaurant building on the northern portion of the Site. Ground water was not encountered in the test pits, and no ground water investigation was conducted at the Site. The proposed redevelopment for the site the Sydney Hall student housing building, with three levels of underground parking, retail space on the street level and eleven stories of student housing.

Dinky Dome and construction of the Sydney Hall Student Residence. Site Description: Historically the one acre Site has been occupied since prior to the 1880 s with residential structures. The Dinky Dome was constructed in the southern part of the Site in 1913 and used as a Bible college until the 1970 s when it converted to retail usage. A building on the northern portion of the Site at the intersection of 15th Avenue SE and 4th Street SE was constructed in 1928, and has been in use until the present time as a restaurant. Residential dwellings occupying the remainder of the Site along 15th Avenue SW were demolished in the 1970s when most of the northern part of the Site was converted into a surface parking lot. A subsurface investigation was conducted in 2008, consisting of excavating five test pits, within the area occupied by the parking lot on the northern part of the Site. Fill containing debris was encountered to depths of 4 to 12 feet. Eleven soil samples were analyzed for selected compounds including volatile organic compounds VOCs, semi-volatile organic compounds (SVOCs), and Resource Conservation and Recovery Act (RCRA) metals. Selected samples of debris were analyzed for asbestos. Xylenes, toluene, SVOCs, arsenic, lead and mercury were detected in the soil samples. The benzo(a)pyrene equivalent of the carcinogenic polynuclear aromatic hydrocarbons and arsenic concentrations were above the MPCA s Industrial Soil Reference Value, and the lead and mercury concentrations were above the Residential Soil Reference value. The Identified Release to soils consists of asbestos, SVOCs, arsenic, lead, and mercury. Petroleum impacted soil is under the oversight of the MPCA s Petroleum Brownfields Program. No soil samples were collected within the footprint of the Dinky Dome, on the southern part of the Site, and the restaurant building on the northern portion of the Site. Ground water was not encountered in the test pits, and no ground water investigation was conducted at the Site. The proposed redevelopment for the site the Sydney Hall student housing building, with three levels of underground parking, retail space on the street level and eleven stories of student housing.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D014

Waste name: METHOXYCHLOR

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Corrective Action Summary:

Event date: 11/26/1985
Event: RFI Imposition

Event date: 11/26/1985
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 08/25/1986
Event: RFI Approved

Event date: 09/28/1987
Event: Date For Remedy Selection (CM Imposed)

Event date: 12/02/1987
Event: Certification Of Remedy Completion Or Construction Completion

Event date: 08/13/1992
Event: RFA Completed

Event date: 09/14/1992
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 09/30/1997
Event: Current Human Exposures under Control, More information is needed to make a determination.

Event date: 09/30/1997
Event: Igration of Contaminated Groundwater under Control, More information is needed to make a determination.

Event date: 11/05/1997
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action at the facility or area referred to CERCLA.

Event date: 01/28/2002
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 05/01/2009
Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.
