Notes: Site Information: The 0.47 acre Site was occupied by residential properties until the early 1950s when the last residential structure was demolished and the current 37,787 square foot building was constructed. The building was formerly occupied by Newman Center and Chapel and is currently leased to the University of Minnesota for use as office space and college classrooms. A subsurface investigation conducted in July 2007 consisted of advancing four soil borings and analyzing selected samples for volatile organic compounds (VOCs), diesel range organics (DRO), polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and RCRA metals. Three groundwater samples collected from temporary wells were analyzed for VOCs, DRO, PAHs, pesticides, and RCRA metals. PAHs, RCRA metals, and DRO were detected in the soil samples. PAHs were at concentrations less than the MPCA Residential Soil Reference Values (SRVs), and the metals were within the naturally occurring background range. Pyrene was detected in the groundwater at concentrations below the Minnesota Department of Health's Health Risk Limit. The identified release (Identified Release) at the Site consists of PAHs in the soil, and pyrene in the groundwater. In addition, ash from the fireplace and incinerator, located within the building, were sampled and analyzed for PAHs, PCBs, and RCRA metals. Lead, cadmium, and mercury were detected at concentrations above the Residential SRVs, and PCBs were detected at concentrations below the SRVs in the ash.

Notes: Site Information: The 0.47 acre Site was occupied by residential properties until the early 1950s when the last residential structure was demolished and the current 37,787 square foot building was constructed. The building was formerly occupied by Newman Center and Chapel and is currently leased to the University of Minnesota for use as office space and college classrooms. A subsurface investigation conducted in July 2007 consisted of advancing four soil borings and

analyzing selected samples for volatile organic compounds (VOCs), diesel range organics (DRO), polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and RCRA metals. Three groundwater samples collected from temporary wells were analyzed for VOCs, DRO, PAHs, pesticides, and RCRA metals. PAHs, RCRA metals, and DRO were detected in the soil samples. PAHs were at concentrations less than the MPCA Residential Soil Reference Values (SRVs), and the metals were within the naturally occurring background range. Pyrene was detected in the groundwater at concentrations below the Minnesota Department of Health's Health Risk Limit. The identified release (Identified Release) at the Site consists of PAHs in the soil, and pyrene in the groundwater. In addition, ash from the fireplace and incinerator, located within the building, were sampled and analyzed for PAHs, PCBs, and RCRA metals. Lead, cadmium, and mercury were detected at concentrations above the Residential SRVs, and PCBs were detected at concentrations below the SRVs in the ash.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Action Taken: Not reported
Public Safety Spill ID: 5864
Site ID: 0
Duty Officer Report No: 25614
Comments: **No file** A hydraulic lab is located over a mechanical space. Spill is onto class 5 rock, which is located on top of limestone. Mechanical space is limestone. This leak has taken place over the last 15 years. There is ground water connected that is potentially effected. We will get a consultant to come and dig it out to check on any contamination.
