

Subject # 2572 Sinclair Station Richfield, MN

I requested a 2nd round of GW samples.

He will get back to me about soil contained associated with dispenser line and pump island

I told him if cont was not addressed under pump island and dispenser line then soil boring are required. ~~I~~ ~~told~~ I talk him to sample GW ^{1/15/58} I told him if significant levels of cont. are found then a monitoring well will be required near the pump island and ^{former} tank basin.
