

From: Larry Quard [^] of T+S one = 297-8602
To: Kelly Kading of Enecotech Phone = 854-5513
Subject #2572 Sinclair Station, Richfield, MN

Jim Berg, the person at Enecotech who handled the project, has left the company.

He said the pump islands and dispenser ~~islands~~ lines were removed. OVM analysis of the soil was not conducted when they were removed but some soil was excavated to a depth of 2 feet.

He will send me photos and notes regarding the removal of the pump islands and dispenser lines.

He is reluctant to advance additional soil borings because new dispenser lines were installed between the ~~the~~ pump islands and new tank basin and it may be difficult to locate the dispenser lines underground.
